

CROP : LETTUCE

Trial carried out in Argentina in 2003

STUDY OBJECTIVE

Evaluation of the effects of AMINOFIT.Xtra applied after a stress incited by an application of herbicide.

Application method : Foliar spray
Assessments : 15 recordings per treatment.

DISCUSSION, CONCLUSION

Under these conditions, AMINOFIT.Xtra induced a significant increase of the root and foliar weight : > 50% compared to the control.

RESULTS

Type of record	Average root weight	Average foliar weight
CONTROL	12 (a)	5.0 (a)
AMINOFIT.Xtra 24 hours pre stress and 48 hours post stress	18 (b)	7.5 (b)
AMINOFIT.Xtra 48 hours post stress and a week after stress	19 (b)	7.9 (b)

Average root and foliar weight
